1. CALL FOR PROPOSAL to Provide Business Development Services for women and youth in Karongi, Rutsiro and Nyamasheke Districts in Rwanda supported by Enabel/Social Protection Project

1.1. Context and Background of the Program

Sustainable enterprises are engines of growth and decent work promotion. They are key to addressing the labour market challenge of creating new jobs and employment opportunities, thereby reducing unemployment and poverty, generating income, and reducing other decent work deficits. In addition, sustainable enterprises are critical for wealth creation innovation, which translates into better living standards, welfare, and social conditions. This rationale is aligned with Rwanda's vision of becoming an upper middle-income country by the year 2035 and reaching high-income status by 2050, where enterprise development is considered one of the key drivers in reducing poverty, promoting social change, fostering innovation and economic transformation.

Equally, over the past decade, social protection and decent work have gained significant international attention. According to the World Bank (2019), rising labour incomes directly accounted for about 40% of the drop in poverty worldwide over the past ten years. Meanwhile, there is a growing consensus that jobs have a more significant role than just providing an adequate income. Without social protection mechanisms, workers are also exposed to work-related accidents, illness, or pregnancy risks.

Likewise, social protection and decent work are high on the Belgian agenda. The Belgian Development Cooperation law explicitly promotes inclusive, fair and sustainable economic growth, local entrepreneurship, the social economy and ILO's Decent Work Agenda.

In accordance with the Rwandan government's goal of creating 1.5 million jobs and addressing social protection deficits, Enabel developed a new approach for social protection and decent work in an innovative way that seeks complementarity solutions with other bilateral programmes in Rwanda and the East Africa region (Uganda and DRC) to address the problem of social and economic inequality.

The long-term ambition of this strategy is to improve the living conditions and resilience of the most vulnerable populations in the Great Lakes region by investing in social protection systems and decent work and promoting sustainable and inclusive socio-economic development.

The specific vision of this strategy is that women and young people of working age in the Great Lakes region have an increased opportunity to engage in decent work, are better protected by labour rights and benefit from social protection and more inclusive social dialogue.

The thematic portfolio is constructed around five important intermediate changes, which become the

strategic axes for the country's strategies. The five strategic axes of this strategy are structured along the four pillars of decent work (ILO). In addition, a one-fifth axis was added to ensure efforts on learning, policy development and national dialogue are adequately addressed at a national and regional level.

- Strategic axis 1 – Decent employment is created and accessible for youth and women in selected sectors to increase their revenue and contribute to social protection schemes.
- Strategic axis 2 – The fundamental principles and rights at work for workers in the formal and informal economy are better respected, protected and fulfilled in selected sectors prone to violations of these principles and rights
- Strategic axis 3 – Increased access for workers and their families to improved social protection mechanisms, particularly in the informal economy, focusing on health insurance and guaranteed income, especially during maternity leave.
- Strategic axis 4 - All workers are represented in social dialogue or other forms of structured dialogue at all levels. Their rights are defended, extended and acquired, focusing on women and youth.
- Strategic axis 5 – Policy development and national dialogue on decent work is strengthened through evidence-based learning, and regional networking and exchange

In addition, the portfolio will focus on the following transversal themes and principles, including social dialogue, Gender equality, creation of green jobs providing decent working conditions, Strong partnerships with local, national, Belgian and international partners, Human rights-based approach, Vulnerable groups and New technologies and the use of ICT

Considering the challenge identified in the Rwanda's National Employment Strategy, of creating jobs for the labor-force with limited skills and basic trainings and with major constraints of access to finance, result one seeks to support both start-up and existing enterprises to create jobs and employment opportunities especially for the youth and women. It focuses on enrolling beneficiaries and supporting them to generate business ideas and transform them into actual enterprises. The creation of new businesses and further growth of existing Micro and Small Enterprises (MSE) on the one side and improving the employability and work readiness of beneficiaries on the other hand are the two entry points of the intervention in supporting employment and decent work creation. The support to MSME's ambitions is to increase self-employment and the creation of new decent jobs in the MSE's. Expansion and enhanced productivity in these enterprises is to increase both the quantity and quality of jobs on the labor market. The employability support (skills development) will be implemented through building on the positive results of the existing dual learning approach and by on-the-job training programs under the bilateral program and will, through this approach, assure that skills development matches real and decent

job opportunities. The intervention focuses on a limited number of geographical zones and sectors.

For the support to MSME's (1.1) the sectors identified are trade, and manufacturing, which according to the national employment strategy have the highest output elasticity of employment. Trade and particular cross-border trade are important considering the high level of women participation. 60 % of cross border trade is done by women, 15 % by disabled persons, while overall 70 % is done through cooperatives²³. The geographical zones include **Karongi, Rutsiro and Nyamasheke** and the rationale for these geographic zones is a combination of : (i) employment potential, (ii) poverty levels of youth and women, (iii) economies of scale with existing Enabel programs, and (iv) cross-border aspects. These districts are also in the geographical scope of the ongoing bilateral program, which allows for building synergies during implementation.

- Compliance with the submission deadline. If the deadline date is not observed, the application will be automatically rejected.

Administrative and admissibility checks

- The concept note satisfies all the criteria specified in points 1 to 12 of the verification and evaluation grid provided in Annex G.
- If any of the information is missing or incorrect, the application may be rejected on this sole basis, and it will not be evaluated.

Evaluation

Concept notes satisfying the conditions of the first administrative and admissibility check will be evaluated for the relevance and design of the proposed action.

The concept note will be given an overall mark out of 50 in accordance with the breakdown specified in points 14 to 19 of the evaluation grid available in Annex F1a.

The evaluation criteria are divided by headings and sub-headings. Each sub-heading will be given a score between 1 and 5 as follows: 1 = very poor, 2 = poor, 3 = average, 4 = good, 5 = very good.

Once all the concept notes have been evaluated, a list will be drawn up, ranking the proposed actions according to their total score.

Firstly, only concept notes with a minimum score of 30 points will be considered for shortlisting.

Secondly, the number of concept notes will be reduced according to their ranking in the list, by the number of concept notes whose total cumulative amount of contributions requested is equal to at least 200% of the budget available for this Call for Proposals.

After evaluation of the concept notes, the contracting authority will send a letter to all applicants, notifying them of the reference number they have been allocated, whether their concept note has been evaluated and the results of this evaluation.

The applicants whose concept notes have been shortlisted will then be invited to submit a complete application

(2) 2nd STAGE: EVALUATION OF PROPOSALS

Firstly, the following points will be evaluated:

Opening

- Compliance with the submission deadline. If the deadline date is not observed, the application will be automatically rejected.

Administrative and Admissibility checks

- The proposal **satisfies all the criteria specified in points 1 to 12 of the verification and evaluation grid provided in Annex F2a.**
- If any of the information is missing or incomplete, the application may be rejected on this **sole** basis and it will not be evaluated.

Evaluation

Step 1: Proposals meeting the conditions of administrative verification and admissibility will be assessed.

The quality of the applications, including the proposed budget and the capacity of the applicants, will be given a score out of 100 on the basis of evaluation criteria 13 to 26 of the **verification and evaluation grid provided in Annex F2a**. The evaluation criteria may be broken down into selection and award criteria.

The evaluation criteria aim to ensure that the applicants:

- **have stable and sufficient sources of financing to maintain their activity** for the duration of the proposed action and, if necessary, to participate in its financing;
- **have the management capacity and professional skills and qualifications required** to successfully carry out the proposed action.

The evaluation criteria also help evaluate the quality of the applications against the objectives and priorities set, and to award grants to projects that maximise the overall effectiveness of the Call for Proposals. They help in selecting applications which assure the contracting authority that their objectives and priorities will be observed. They concern the relevance of the action and its consistency with the Call for Proposal's objectives, its quality, its intended effect, the sustainability of the action and its cost-effectiveness.

The evaluation criteria are divided into headings and sub-headings. Each sub-section will be assigned a score between 1 and 5 as follows: 1 = very poor, 2 = poor, 3 = average, 4 = good, 5 = very good.

Only proposals that have achieved a score of 6/10 for criterion 18 and an overall score of 60/100 will be shortlisted.

The best proposals will be listed in a provisional allocation table, ranked according to their score and within the limits of available funds. The other shortlisted proposals will be placed on a reserve list.

Step 2: Supporting documents relating to the grounds for exclusion will be requested from applicants appearing in the provisional allocation table. If unable to provide these documents within 15 days, the corresponding proposals will not be accepted.

Provisional selection

At the end of step 2, a table will be drawn up, containing all the applications ranked according to their score and subject to the funds available. A reserve list will additionally be drawn up following the same criteria, to be used if more funds become available during the validity period of this list.

Organizational assessment:

After the provisional selection, the selected applicant will have to undergo an organizational assessment which will be organized by Enabel.

Please note that applicants who may be picked up from the reserve list at a later date, if additional funds become available, will also have to go through step 2 described above as well as undergo the organizational assessment

2.4. Notification of the contracting authority's decision

2.4.1. Content of the decision

The applicant will be notified in writing of the decision taken by the contracting authority concerning its application and, in case of rejection, the grounds for this negative decision.

If an applicant feels that it has been adversely affected by an error or mistake allegedly committed in an award procedure or believes that the procedure has been vitiated by an instance of maladministration, it may file a complaint with the contracting authority.

In this case, the complaint will be sent to the person who made the disputed decision, who will endeavour to deal with the complaint and give a reply within 15 working days. Alternatively, or in case the reply is deemed unsatisfactory by the applicant, this latter may contact the competent Operations Manager at Enabel's head office, via the mailbox complaints@enabel.be
See: <https://www.enabel.be/content/complaints-management>

Complaints relating to issues of integrity (fraud, corruption, etc.) should be sent to the Integrity Office through the Internet address www.enabelintegrity.be.

The purpose of the complaint cannot be to request a second evaluation of the Proposals without any other grounds than that the applicant disagrees with the award decision.

2.5. Implementation conditions following the grant award decision of the contracting authority

Following the grant award decision, contracting beneficiaries will be offered an agreement based on the contracting authority's Grant Agreement template (Annex F of these guidelines). By signing the proposal (Annex A of these guidelines), applicants accept the contractual conditions of the Grant Agreement template, should the grants be awarded to them.

2.5.1. Implementation contracts

Where the implementation of an action requires public procurement by the Contracting Beneficiary, contracts must be awarded in accordance with:

Annex VII of the Grant Agreement template **(for private sector applicants)**. Or

Partner country public procurement law or own regulation **(for public sector applicants)**

For private contracting beneficiaries, it is not permitted to subcontract all of an action by means of a contract. In addition, the budget of each contract financed by means of the grant granted may only correspond to a limited part of the total amount of the grant.

2.5.2. Separate bank account

In case of grant award, the contracting beneficiary shall open a separate bank account (or a separate sub-account allowing for the identification of the funds received). This account will be in euros, if this is possible in the country.

This account or sub-account must allow to:

- Identify the funds transferred by Enabel;
- Identify and follow up the operations performed with third parties;
- Distinguish between the operations performed under this agreement and other operations.

The financial identification form (Annex VI of the Grant Agreement) relating to this separate bank account, certified by the bank⁵, will be sent by the contracting beneficiary to Enabel at the same time as the signed copies of the Grant Agreement after it has been notified through the award decision.

The account will be closed once any reimbursements owed to enabel have been made (and after settling the final amount of the funds used).

⁵ This bank must be situated in the country where the applicant is established

2.5.3. Processing of personal data.

Enabel undertakes to treat the personal data communicated in response to this call for proposals with the greatest care, in accordance with the legislation on the protection of personal data (the General Data Protection Regulation, GDPR). In cases where the Belgian law of July 30, 2018 on the protection of individuals with regard to the processing of personal data contains more stringent requirements, the adjudicator will act in accordance with this legislation.

More specifically, when you participate in a call for proposals within the framework of the allocation of grants by Enabel, we collect the details of the contact persons ("authorized representative") of the entity submitting the grant application, such as the name, first name, professional telephone number, professional e-mail address, professional function and name of the organization represented. In some cases, we must also collect the extract from the criminal record (or equivalent) of the leader of the organization applying for the grant.

We process this information because we have a legal obligation to collect this information in the context of the administration and award of our grants.

For more information on this subject, please consult Enabel's privacy statement at the following link: <https://www.enabel.be/fr/content/title-1> "

2.5.4. Transparency

For the sake of transparency, Enabel undertakes to publish an annual list of contracting beneficiaries. By signing the Grant Agreement, the contracting beneficiary declares that he agrees with the publication of the title of the contract, the nature and object of the contract, its name and location, and the amount of the contract.

2.3. Duration of the indicative action plan for implementation of the action (maximum 4 pages)

The duration of the action will be <X> months.

Applicants should not indicate a specific starting date for implementation of the action but simply indicate “month 1”, “month 2”, etc..

It is recommended that applicants base the estimated duration of each activity and the total period on the most likely duration and not on the shortest possible duration, taking into account all relevant factors which could affect the implementation timetable.

The activities provided for in the action plan must correspond to those described in detail in point 2.1.1. The organisation responsible for implementation must be either the applicants, the associates or the sub-contractors. Any period without activities must be included in the action plan and in the evaluation of the total estimated duration of the action.

The action plan for the first 12 months of implementation must be sufficiently detailed to give an idea of the preparation and implementation of each activity. The action plan for each subsequent year may be more general and only needs to indicate the main activities proposed for these years. For this purpose, it must be divided into 6-month periods (NB.: a more detailed action plan for each subsequent year must be submitted before any new pre-financing payment in accordance with Article 11 of the Grant Agreement special conditions).

The action plan will be drafted in accordance with the following template:

Year 1

Performance Activity 1 (title)									applicant
Performance Activity 2 (title)									co-applicant
Preparation Activity 3 (title)									co-applicant
Etc.									

2.4. Sustainability of the action (maximum 3 pages)

Please provide **all** the information requested below:

- describe the expected impact of the action at the technical, economic, social and political levels, including quantified data where possible (will the action improve legislation, codes of conduct, methods, etc.);
- describe a distribution plan and the possibilities of replicating and extending the action's results (multiplier effect), clearly indicating all proposed distribution channels;
- provide a detailed analysis of the risks and emergency plans. This must include a list of risks associated with each action proposed, along with measures to address them. A good analysis of risks will include a series of standard risks including physical, environmental, political, economic and social risks;
- describe the main pre-conditions and assumptions during and after the implementation phase;
- explain how the action will become sustainable once successfully completed. This may involve monitoring actions, internal strategy actions, ownership actions, communication plan actions, etc. Please distinguish between the following four sustainability aspects:
 - a) financial sustainability: for example, the financing of monitoring activities and revenue sources to cover all future operational and maintenance costs;
 - b) institutional level: for example, the structures that will allow the results of the action to remain in place after the action ends, capacity building, agreements and local "ownership" of action results;
 - c) viability at the political level, for example, where applicable, the structural impact (improved legislation, consistency with existing frameworks, codes of conduct or methods);
 - d) environmental viability (what impact will the action have on the environment?; mention the conditions put in place to avoid negative effects on the natural resources on which the action depends as well as on the natural environment in the broad sense).

2.5. Logical framework

Please complete Annex C of the guidelines for applicants.

2.6. Budget, amount requested from the contracting authority and other expected sources of financing

Please complete Annex B of the guidelines for applicants for the following points:

For more information, see guidelines for grant applicants (points 1.3, 2.1.4).

ANNEX VIII: Procurement principles (for a private contracting beneficiary)
--

If the implementation of an Action requires procurement by the Contracting Beneficiary, the contract must be awarded to the tender offering best value for money (i.e. the tender offering the best price-quality ratio) or, as appropriate, to the tender offering the lowest price. In doing so, the Contracting Beneficiary shall avoid any conflict of interests and respect the following basic principles:

- Where the Contracting Beneficiary does not launch an open tender procedure it shall justify the choice of tenderers that are invited to submit an offer.
- The Contracting Beneficiary shall evaluate the offers received against objective criteria which enable measuring the quality of the offers and which take into account the price (the offer with the lowest price shall be awarded the highest score for the price criterion).
- The Contracting Beneficiary shall keep sufficient and appropriate documentation with regard to the procedures applied and which justify the decision on the pre-selection of tenderers (where an open tender procedure is not used) and the award decision.

The Contracting Beneficiary may decide to apply the procedures provided for in the Belgian Public Procurement Legislation. If these procedures are correctly followed the principles above will be deemed complied with.

Enabel will carry out <ex ante/ex post> checks (see article 12) on the Contracting Beneficiary's compliance with the principles above. Failure to comply with these principles or rules would render the related expenditure ineligible for funding.

The provisions of this Annex apply *mutatis mutandis* to contracts to be concluded by the co-applicants, partners of the Contracting Beneficiary.
